

FACT SHEET

**Providence Health Care (PHC)** is a world-class, faith-based health care organization encompassing seven sites that provide acute and residential care and rehabilitation services in Vancouver, British Columbia. A recipient of the 2005 *International Spirit at Work Award*, PHC is a leading teaching and research organization and the provincial referral centre for Cardiac, HIV/AIDS and Renal care. We are known for our Centres of Excellence and recognized for a number of speciality programs and services across the continuum of care.

The Radiology Department at Providence Health Care spans two sites, St. Paul's and Mount Saint Joseph Hospitals. Our staff provide services at both hospitals and students of all levels are trained at both sites.

**St. Paul's Hospital** is a large downtown teaching facility. We perform CT, MRI, Ultrasound, Nuclear Medicine, Angiography, Interventional and Radiography procedures.

**Mount Saint Joseph Hospital** is a community hospital. We perform CT, Ultrasound, Echocardiography and Radiography. We also perform screening and diagnostic Mammography as well as breast Ultrasound.

The Radiology staff is a dynamic, enthusiastic group of caregivers who strive to provide the best for their patients. Our team also works directly with other professionals across the organization.

**Education**

All our technical and medical staff have graduated from accredited programs and have current registration with their professionals registries or organizations. Ongoing educational events and rounds are held on a continual basis to support a high level of diagnostic care.
