

Jennifer Bell, MA, Doctoral Student

Jennifer Bell is a doctoral student in the University of British Columbia's Interdisciplinary Studies Graduate Program where she is under the supervision of Dr. Lynda Balneaves in the School of Nursing and Dr. Anita Ho at the W. Maurice Young Centre for Applied Ethics. Her dissertation project aims to develop cancer patient-centred decision support strategies that will address the tenets of informed consent but acknowledge the social and personal context of autonomous treatment decision-making. Previous to joining Providence Health Care as an Ethics Fellow, Jennifer completed a one year, full time clinical and organizational ethics fellowship at the University of Toronto Joint Centre for Bioethics in Toronto, Ontario.

Jennifer received her BA (Honours) in Philosophy with a specialist in Bioethics from the University of Toronto in 2004 and her MA in Philosophy with a specialization in Biomedical Ethics at McGill University in 2007. Her main research interests include the physician-patient relationship, models of autonomy and treatment decision making, social justice, psychosocial oncology, research ethics, feminist bioethics, and understandings of self in chronic illness.

Jennifer holds a three year Frederick Banting and Charles Best Canada Graduate Scholarship from CIHR, is a doctoral fellow in the CIHR/NCIC psychosocial oncology research training program (PORT), and the CIHR Ethics of Health Research and Policy Training Program. Her recently published articles can be found in the Journal of Medical Ethics, the American Journal of Bioethics, Social Science & Medicine, HEC Forum, JONAS Healthcare Law, Ethics, and Regulation, BMC Medical Ethics, and BMC Health Services Research.
