

PHC SIMULATION

Spotlight

Code pink, Cord prolapse, Obstetrical Emergency!

A travelling sim: Originated in Maternity and ended with an emergency delivery in the OR.

Having fun yet?

ICU fellows: cardiac arrest in the stairwell!
Code blue managed with aplomb! Patient was transferred onto a stretcher....how????

RESOURCES/ INFORMATION

Education

VCH March 25-26: [Simulation Learning Strategies - Facilitator Development](#)

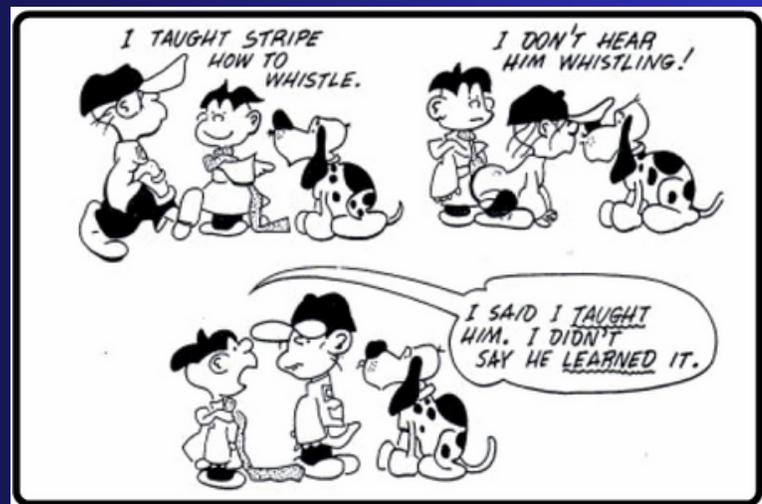

BCCW March 11-12: [Simulation Learning Strategies-Facilitator Development](#)

WCCHSE 2024 Conference May 16-17
[BCIT Burnaby Campus](#)

New Initiatives

February 2024: First 5 mins- Code Blue in CTU

- Recognize deterioration
- Call for help
- Start CPR
- Activate code blue

Tiger

“For some competencies, teaching and assessing these skills solely in the clinical environment is challenging or even unfeasible for relatively rare events.”

Competency-based simulation education: should competency standards apply for simulation educators?
Walter Eppich1 and Adam Cheng2

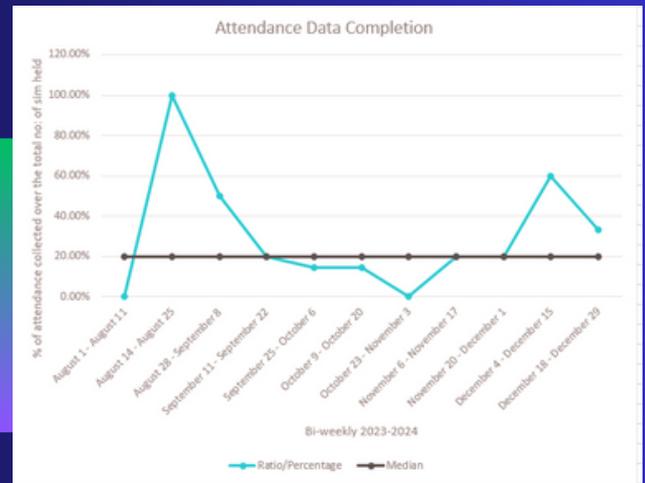

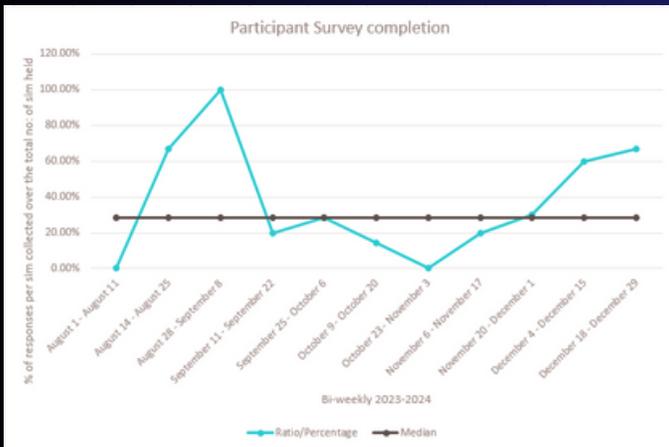

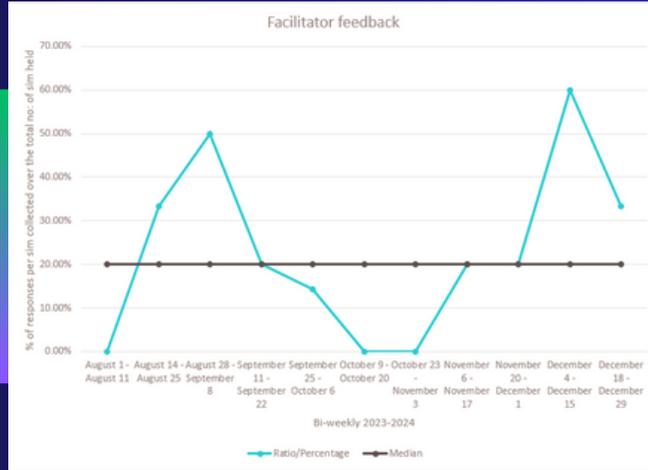

DATA

Feedback Data

From Aug 1 2023 to Jan 5 2024, 61 in-situ simulations were held.

Out of 61 simulations:

- 20% facilitator feedback was received
- 28% attendance data was received
- 31% participant feedback was received
