Providence

Older Adult Outpatient Clinic REFERRAL FORM

The Older Adult Ambulatory Clinics at St. Paul's Hospital and Mount Saint Joseph Hospital provide an interdisciplinary approach for older adults (65+), living in the lower mainland region, who are experiencing health changes that impact their physical, cognitive or psychosocial well being.

Referrals to geriatricians, geriatric psychiatrists, and physiatrists must be approved by a family physician, NP or hospital based physician. Referrals to other members of the interdisciplinary team can be made by any health care provider.

INFORMATION FOR THE FIRST VISIT:

- This visit may take up to 2 hours.
- Please instruct patient to bring their care card, medications, and a family member or friend to help them understand and remember information.

SERVICES OFFERED:

Geriatric Medicine

• Comprehensive geriatric assessment, cognitive assessment diagnosis and management, medical review, preoperative assessment, falls assessment, medical assessment of homebound Older Adults within Vancouver.

Geriatric Psychiatry

• Cognitive assessment, treatment of behavioural features of dementia, assessment and treatment of mood, anxiety and psychosis, geriatric psychiatry outreach to homebound Older Adults within the catchment area.

Physiatry (also known as Physical Medicine and Rehabilitation)

• Assessment and treatment to improve function from medical conditions affecting the brain, nerves, bones, muscles, joints, and tendons/ligaments. This may involve education, activity modification, medications, bracing, injections, and other rehabilitation recommendations.

Continence Clinic

The multidisciplinary Continence Clinic includes a geriatrician, a nurse continence advisor and a pelvic floor
physiotherapist, who treat patients with urinary/bowl incontinence, pelvic organ prolapse, symptoms related to
incontinence, constipation, urinary retention, recurrent UTI, urinary frequency, urgency, dysuria, and catheter
management issues.

Dementia Caregiver Resilience Clinic

 Designed for caregivers of people with dementia, this St. Paul's Hospital based clinic supports caregiver skillbuilding, education, and strengthening of self-care strategies through evidence-based group interventions and/or individual sessions with interdisciplinary professionals.

Physiotherapy

 Balance and gait retraining, vestibular rehabilitation for inner ear dysfunction and dizziness, fall prevention, and to optimize function.

Occupational Therapy

 Cognitive assessment and treatment, mild cognitive impairment and dementia education for patients and families, individualized memory, brain health and sleep strategies, assessment of day to day function to optimize safety and independence, caregiver support and skill building.

Social Work (at SPH only)

• Future planning for patient and caregiver support, linking with community resources and psychosocial stressors.

Access to Neuropsychologists available via internal clinic referral only
